EDUCATION

University of Florida, Gainesville, FL
Bachelor of Science
Major: Computer Science

Expected Graduation: May 2028

St. Petersburg College, St. Petersburg, FL
Associate of Arts

August 2022 – December 2025

Major: Computer & Information Science | **Major GPA:** 3.3

Relevant Coursework: C++ (Unreal Engine), C# Programming, IOS Application Development, and Python Programming

DESIGN & TECHNICAL SKILLS

- **Languages:** C++ (Blueprint Programming), CSS, HTML, Python, Swift
- **Tools:** Canva, Figma, Git, GitHub, SwiftUI, Unreal Engine, Visual Studio Code, Xcode
- **Concepts:** Algorithms, Data Structures, Object-Oriented Programming, Version Control Principles

EXPERIENCE

Keep Pinellas Beautiful, St. Petersburg, FL
Web Development & UX Intern

January 2026 – May 2026

- Conducted informal user research by gathering website usability feedback directly from community members during in-person outreach events, then translated findings into comprehensive improvements on the live site
- Contributed to accessibility-focused website improvements by reviewing readability and responsive behavior
- Bridged the gap between technical implementation and team understanding by clearly explaining digital processes, development suggestions, and newly prototyped website features during team meetings
- Executed front-end layout refinements and adjustments using HTML and CSS to improve structural organization, strengthen responsive design performance, and maintain consistent visual standards across web page
- Utilized AI-assisted development tools to create new website functionality and accelerate debugging workflows

PROJECTS

Data Processing Scripts, Python in Visual Studio Code

- Used data structures, functions, and conditional logic for processing user input and adding validation checks to prevent errors, while modularizing the code into sections to improve reusability for long-term maintenance
- Developed tools include budget and FSA expenditure calculator, health metric average calculator (e.g., blood pressure), data categorization scripts (e.g., animal counters), and meal cost and tip estimation calculator

The Nail Gallery, Swift in Xcode

- Created a user-centered appointment scheduling application that supports customizable design selections and timeslot booking through intuitive form inputs, while maintaining a cohesive interface and seamless experience

Polish (Nail Gallery Redesign), Figma

- Redesigned a previously developed booking app from a single dense screen into an intuitive four-step flow, reducing cognitive load, clarifying user decisions, and improving navigation throughout the booking experience
- Consolidated decision points (salon, shape, length, and design) into focused steps, adding progress indicators and clear selection states to reduce hesitation and reinforce a consistent visual system throughout the flow

Interests

- Beach Volleyball, Kickboxing, Photography, Pilates, Plants, Pottery, Reading, Sewing, Upcycling, Weightlifting
